

Manufactured by:

Rhombus Time Alarm and Dosing Panels

Simplex TD Panel

The Model TD panel (10" x 8" x 4" NEMA 4X enclosure) provides a reliable means of controlling one single phase pump in onsite septic installations. A programmable timer activates a magnetic motor contactor to turn the pump on and off. The Model TD panel features a control fuse and an alarm fuse.

Duplex DTD Panel

The Model DTD panel (14" x 12" x 6" NEMA 4X enclosure) provides a reliable means of controlling two single phase pumps. A programmable timer, in conjunction with an alternating circuit board, alternately activate the magnetic contactors to turn the pumps on and off and equalize pump wear. The Model DTD panel features a control/alarm fuse.

Model TD and DTD Panel Feature:

- Entire control system is UL Listed
- Magnetic motor contactor(s)
- HOA switch(es)
- Float switch terminal block
- Power and pump terminal block
- Programmable timer
- Circuit breaker(s)
- Alarm horn and beacon
- Exterior horn test/normal/silence switch
- Available in 120 or 120/208/240 VAC
- Three-year limited warranty
