**Things to Remember!!**

Even more than ever, the Enviro-Septic® System is the simplest and easiest septic system, producing Level IV Quality Effluent. It:

- Does not require pumps or aerators
  - Does not require electricity
  - Does not require washed stone
  - Does not have any moving parts
- Does not require any maintenance except an annual inspection
  - Can be installed in ground, partially raised or fully raised.
    - Very easy to install
  - Does not require a mantle.
