Please practice proper social distancing, stay home if possible and stay safe! Thank you.

COVID19 Resources for Onsite Professionals

There's lots of information coming our way regarding COVID-19 these days. It's important to stay informed about this crisis and it's important to get this information from trusted and reliable sources. Below are some links to resources on topics that may be helpful to you and your business during this challenging time. **Please note that what is known about the virus is increasing and changing frequently. Be sure that your information sources are current!**

[Are Septic System Professionals at a Greater Risk for COVID-19?](#)

What we know so far about transmission of the virus via sewage, and how to protect yourself and your team

Sara Heger, Ph.D.

March 17, 2020

Onsite Installer Magazine

From the article:

"The Center for Disease Control and Prevention notes that wastewater and sewage workers should use standard practices of basic hygiene precautions (e.g., hand-washing) and wearing personal protective equipment as prescribed for current work tasks. In consultation with local health officials, onsite sewage system professionals should consider the following routine disease prevention practices for onsite sewage system tank cleaning, operation and maintenance, and repairs to help protect service providers from potential infection of COVID-19."

Coronavirus and Drinking Water and Wastewater

US Environmental Protection Agency

Date: Not Available

From the website:

"Will my septic system treat COVID-19?"

While decentralized wastewater treatment (i.e., septic tanks) do not disinfect, EPA expects a properly managed septic system to treat COVID-19 the same way it safely manages other viruses often found in wastewater. Additionally, when properly installed, a septic system is located at a distance and location designed to avoid impacting a water supply well."
