

Enviro-Post April 2021

Thank you for attending our 2021 training sessions, ZOOM style!

This month we had 3 mornings of training for the Enviro-Septic System. All meetings were well attended. We just want to take time to say thank you to all that attended. We trust that you enjoyed the sessions and were able to take away a little more knowledge than you had before.

If you were unable to join us on any of the 3 scheduled days, please call your area representative and they will love to help you.

Eastern Ontario – Roddy 613.314.7597 rodny@makeway.ca

Central Ontario – Graham 519.280.4487 graham@makeway.ca

SW and Northern Ontario – Bert 519.709.0681 bert@makeway.ca

The screenshot shows a Zoom meeting window. The main content is a presentation slide titled "The Enviro-Septic System" by MAKEWAY. The slide features the Enviro-Septic logo with the tagline "Preserving nature's ways." and the MakeWay logo. Below the title, it states "No question about it, the world's simplest advance treatment sewage system in the world!". Key features listed are "No Stone", "No Moving Parts", "No Electricity", "No 15m Mantle", and "CAN/BNQ 3680-600". The slide includes a 3D cutaway diagram of the septic system installed in a yard, showing the house, a septic tank, and a distribution box with multiple lines leading to a series of underground chambers. The Zoom interface includes a video grid on the right with four participants, a video player at the bottom with a progress bar at 1:13:00, and a time of 0:24:12 in the bottom right corner.

The Enviro-Septic System is a simple and easy septic system, producing Level IV Quality Effluent. It:

Does not require pumps or aerators * Does not require a mantle * Does not require washed stone * Very easy to install * Does not require maintenance except the OBC mandated annual inspection * Can be installed in ground, partially raised or fully raised * Does not have any moving parts * Does not require electricity * Does not require media replacement * Easy to acquire a sample, every time

We also briefly introduced our Stormwater / Rainwater / Greywater line of products.
