

Enviro-post: BMEC Announcement - July 2023

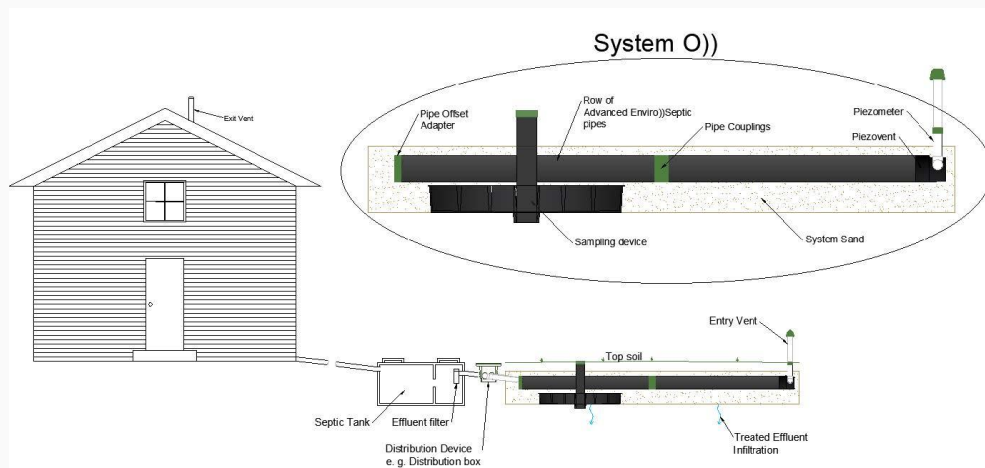

## SPECIAL ANNOUNCEMENT!

**Our new System O)) BMEC is here. Actually, we now have two BMECs. This will make the System O)) the most versatile sewage treatment system in Ontario.**

---

Our BMEC for 'Standard Configuration', BMEC #23-05-407, is still QT/400 but we now also have QT/850 when the T time is  $\leq 15$  min/cm.

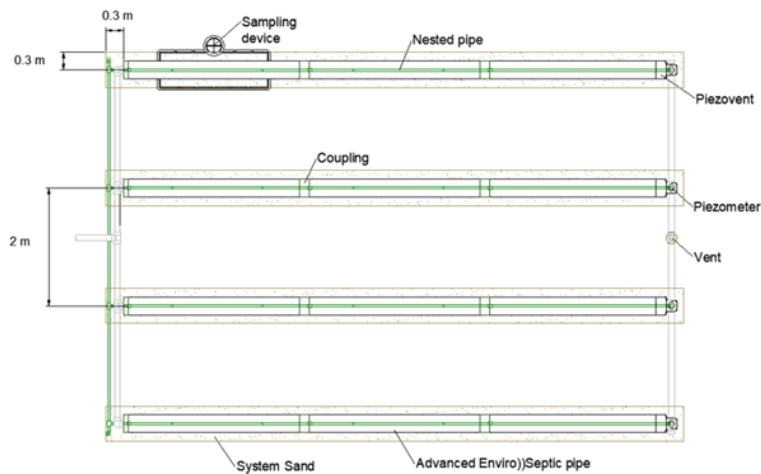

Our second BMEC is the 'Nestled Pipe' configuration, BMEC #23-06-408. This is equivalent to the Shallow Buried Trench dispersal bed.

**Side View – Nested Pipe Configuration**

**Top View – Nested Pipe Configuration**

This configuration is phenomenal. We can now install our system when the T time is up to 125 min/cm, always on 2.0m centres. This will reduce the footprint and the quantity of system sand needed by up to 50%. This system will require a pump station but the reduction in contact area and quantity of system sand is significant.

Please give us a call today for a copy of our BMECs.

These are sample pictures only. In Ontario, Nested Pipe will always be on 2.0m centres.

---
