

2026! Give us a call!

A new year brings new opportunities! It is never too early to start thinking about or planning for the upcoming installation season. Got questions? Give us a call. Want an in-house presentation (Lunch & Learn)? Give us a call! Want someone to attend your installation? Give us a call! Even if you just want to chit-chat about the industry, give us a call!

Winter in Ontario is not over yet, and it is different for everyone! Whether you have lots of snow or just a little, it's important to keep your furnace and water heater vents clear of snow. It is also important for your customers to care for the vent on their System O)) septic systems to ensure it works throughout the cold season.

Entry vent pipes must extend high enough to remain **above the maximum anticipated snow level** to ensure proper airflow. If snow blocks a vent, it can lead to odors, ineffective treatment, or freezing issues (while the system itself is generally resistant to freezing due to heat from bacterial activity and warm influent water, improper venting can contribute to freezing in distribution boxes or exposed pipes). The green mushroom vents are a nice alternative solution to the candy cane vent.

It's Easy, It's Simple, It Works!

OOWA's Regional Meetings (Ottawa, Peterborough, & Barrie). Always an excellent way to gain and share industry knowledge. Make-Way Environmental Technologies Inc was proud to be the Gold sponsor for all the OOWA Regional Meetings! Last Regional Meeting set for Port Carling, February 10, 2026. We hope to see you there!
