## Stormwater Management Speak & Listen Continuing Education Sessions

Did you know Make-Way provides stormwater management products?

We have been having more conversations lately about how the value of land, “gentle density” objectives, and available infrastructure all intersect at stormwater management. A big part of a successful and practical solution comes down to understanding how to leverage all the tools in the stormwater management toolbox. Stormwater management is changing, and underground storage solutions using Graf EcoBlocs are a new tool in that toolbox.

That's why we offer our "Speak and Listen" sessions. (Snacks / Lunch and CE certificates provided). Our sessions start with information customized to the audience - landscape architects, urban planners, developers, engineers, contractors, or regulators. Then it's your turn to tell us about the challenges you are dealing with. Together, we can discuss how underground stormwater management can contribute to a solution.

Our goal is a thoughtful discussion of how site-level stormwater management, including underground management, can meet goals of cost-effective site development, approvals requirements, integration with existing infrastructure, and, overall, contribute to a more resilient urban environment.

Is your team interested in scheduling a session? Please connect with our team and book a session below.

Book a personalized S&L session about stormwater management built around your team's current projects.
